

2011 NORTHWEST TRENCHLESS CONFERENCE

The North American Society for Trenchless Technology (NASTT) and the Tunnelling Association of Canada (TAC) are associations of consulting engineers, educators, contractors, government agencies and regulators involved with the application of trenchless technologies and underground construction. NASTT and TAC are not-for-profit societies dedicated to promoting the benefits of trenchless technology and underground construction through education and training for public awareness of solutions to underground infrastructure problems.

The NASTT Northwest Chapter consists of the provinces of Alberta, Saskatchewan and Manitoba. Calgary will be hosting the 2011 Trenchless Conference at the Coast Plaza Hotel.

Registration is now open for the following:

- Wednesday November 16th - Cured in Place Pipe Best Practices Short Course
The CIPP Short Course will cover design methods for gravity and pressure applications, construction considerations, specifications and tendering and inspection
- Thursday November 17th – Symposium and Trade Show.

Registration information is available online at:

www.nastt-nw.com
